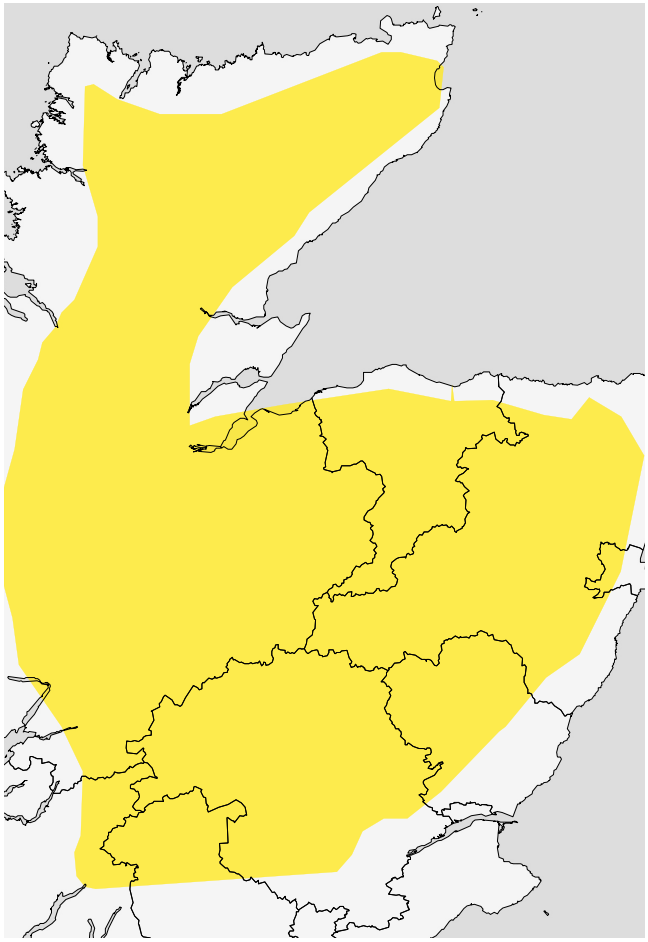
Yellow warning
Snow

Between
00:00 Thu 4 Feb 2021 and
06:00 Sat 6 Feb 2021



Persistent snow is likely to bring disruption to travel and utilities.

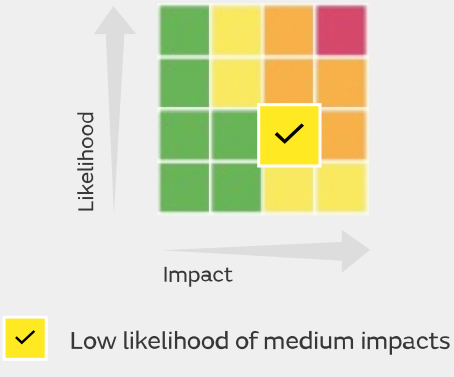
What to expect

- Possible travel delays on roads stranding some vehicles and passengers
- Possible delays or cancellations to rail and air travel
- Some rural communities could become cut off
- Power cuts may occur and other services, such as mobile phone coverage, may be affected

Further details

An area of snow is expected to persist across northern and northeastern parts of Scotland until early in the weekend, when snow should begin to ease and clear. Above 150 m some 10-20 cm of snow is likely, with locally 30 cm above 250 m. For lower levels, away from eastern coasts, where rain is more likely, 2-5 cm of snow is possible. As colder air sinks south later Friday, snow will likely fall at all levels, though by then it is unlikely to be as heavy.

As well as heavy snow, strong winds will be an additional hazard, with blizzard conditions likely at times.



Low likelihood of medium impacts
